

Indications for Coverage

Introduction:

ConnectiCare covers certain medical services under the preventive care services benefit. The federal Patient Protection and Affordable Care Act (PPACA) requires non-grandfathered health plans to cover certain “recommended preventive services” as identified by PPACA under the preventive care services benefit, without cost sharing to members when provided by network physicians. This includes:

- Evidence-based items or services that have in effect a rating of “A” or “B” in the current recommendations of the [U.S Preventive Services Task Force](#).
- Immunizations for routine use in children, adolescents and adults that have in effect a recommendation from the [Advisory Committee on Immunization Practices of the Centers for Disease Control and Prevention](#).
- With respect to infants, children and adolescents, evidence-informed preventive care and screenings provided for in the comprehensive guidelines supported by the [Health Resources and Services Administration](#) and the American Academy of Pediatrics [Bright Futures](#) guidelines.
- Such additional preventive care and screenings as provided for in comprehensive guidelines supported by the [Health Resources and Services Administration](#).
- Mandates for preventive services may differ by state.

Member Cost-Sharing (Non-grandfathered Plans):

- Non-grandfathered plans provide coverage for preventive care services with no member cost sharing (i.e. covered at 100% of Allowed Amounts without deductible, coinsurance or copayment) when services are obtained from a Network provider.
- Under PPACA, services obtained from an out-of-network provider are not required to be covered under a plan’s preventive benefit and may be subject to member cost sharing. Refer to the member specific benefit plan document for out-of-network benefit information, if any.

Grandfathered Plans:

- Plans that maintain grandfathered status under PPACA are not required by law to provide coverage for these preventive services without member cost sharing; although a grandfathered plan may choose to voluntarily amend its plan document to include these preventive benefits.
- Except where there are state mandates, a grandfathered plan might include member cost sharing, or exclude some of the preventive care services identified under PPACA.
- Refer to the member specific benefit plan document for details on how benefits are covered under a grandfathered plan

Preventive vs. Diagnostic Services:

Certain services can be done for preventive or diagnostic reasons. When a service is performed for the purpose of preventive screening and is appropriately reported, it will be considered under the preventive care services benefit. This includes services directly related to the performance of a covered preventive care service.

Preventive services are those performed on a person who:

- Has not had the preventive screening done before and does not have symptoms or other abnormal studies suggesting abnormalities; or
- Has had screening done within the recommended interval with the findings considered normal; or
- Has had diagnostic services results that were normal after which the physician recommendation would be for future preventive screening studies using the preventive services intervals.

When a service is done for diagnostic purposes it will be considered under the applicable non-preventive medical benefit. Diagnostic services are done on a person who:

- Had abnormalities found on previous preventive or diagnostic studies that require further diagnostic studies; or
- Had abnormalities found on previous preventive or diagnostic studies that would recommend a repeat of the same studies within shortened time intervals from the recommended preventive screening time intervals; or
- Had a symptom(s) that required further diagnosis; or
- Does not fall within the applicable population for a recommendation or guideline.

Covered Breastfeeding Equipment:

Personal-use electric breast pump:

- The purchase of a personal-use electric breast pump (HCPCS code E0603).
 - ✓ This benefit is limited to one pump per birth. In the case of a birth resulting in multiple infants, only one breast pump is covered.
 - ✓ A breast pump purchase includes the necessary supplies for the pump to operate.
- Replacement breast pump supplies necessary for the personal-use electric breast pump to operate. This includes: *standard power adaptor, tubing adaptors, tubing, locking rings, bottles specific to breast pump operation, caps for bottles that are specific to the breast pump, valves, filters, and breast shield and/or splash protector for use with the breast pump.*

Coverage Limitations and Exclusions

- Services not covered under the preventive care benefit may be covered under another portion of the medical benefit plan.
- The coverage outlined in this guideline does not address certain outpatient prescription medications, tobacco cessation drugs and/or over the counter items, as required by PPACA. These preventive benefits are administered by the member's pharmacy plan administrator. For details on coverage, refer to the member-specific pharmacy plan administrator.
- A vaccine (immunization) is not covered if it does not meet company vaccine policy requirements for FDA labeling and if it does not have explicit ACIP recommendations for routine use published in the Morbidity and Mortality Weekly Report (MMWR) of the Centers for Disease Control and Prevention (CDC).
- Examinations, screenings, testing, or vaccines (immunizations) are not covered when:
 - ✓ required solely for the purposes of career or employment, school or education, sports or camp, travel (including travel vaccines (immunizations)), insurance, marriage or adoption; or
 - ✓ related to judicial or administrative proceedings or orders; or
 - ✓ conducted for purposes of medical research; or
 - ✓ required to obtain or maintain a license of any type.

- Services that are investigational, experimental, unproven or not medically necessary are not covered.
- Correct Coding Guidelines apply to services listed below

Note: Benefits limits are on a rolling 12-month basis unless otherwise noted

The following list(s) of procedure and/or diagnosis codes is provided for reference purposes only and may not be all inclusive. Listing of a code in this guideline does not imply that the service described by the code is a covered or non-covered health service. Benefit coverage for health services is determined by the member specific benefit plan document and applicable laws that may require coverage for a specific service. The inclusion of a code does not imply any right to reimbursement or guarantee claim payment. Other Policies and Guidelines may apply.
