

Administrative Services Only (ASO) Repricing from EmblemHealth

Here to Help Drive Savings for Your Organization

EmblemHealth is here to help drive savings for your organization through our Administrative Services-Only (ASO) offerings. And we can prove it!

With some information about the providers your employees use, and claims information, we can tell you just how much you can save with EmblemHealth ASO. **It's easy!**

We will provide you with a guide on requirements for disruption and repricing. Simply provide the required data for provider disruption and claims repricing and return it to us.

EmblemHealth will be able to complete the repricing analysis in a reasonable time frame. Your representative will then be able to walk you through the savings potential. When we meet, we'll present two extensive analyses of your group's health care expenditures:

- **Complimentary claim repricing based on an analysis of your claims history.** We'll show you in precise dollar amounts what your real health coverage costs are and how much your group could save with the ASO program.
- **A head-to-head comparison of every provider and facility** in your current network to demonstrate the EmblemHealth network advantage.

With EmblemHealth ASO offerings, you get our robust presence in the tristate area* including 50,000+ primary care doctors**, 81,000+ specialists and 300 hospitals. You also get access to 744,000+ providers and 5,300 hospitals nationwide***.

For more information, contact your representative to get started right away!

*Tristate area includes all 62 counties in New York, all 21 counties in New Jersey, and all 8 counties in Connecticut.

**Criteria for primary care doctor status is based on board-certified specialties. Providers are considered primary care doctors if they have a board-certified specialty of Internal Medicine, Family Practice, General Practice or Pediatrics.

***Counts as of May 2020 provided by First Health.
