

## 2019 Medicare Part D Formulary Change

We may add or remove drugs from our formulary during the year. If we remove drugs from our formulary, or add prior authorizations, quantity limits and/or step therapy restrictions on a drug (or move a drug to a higher cost-sharing tier), we will let you know of the change at least 30 days before the date that the change becomes effective. However, if the Food and Drug Administration deems a drug on our formulary to be unsafe or the drug's manufacturer removes the drug from the market, we will immediately remove the drug from our formulary and let you know.

The product changes noted below will be implemented on the Medicare Part D Plan:
