

EmblemHealth Pharmacy Benefit Services 2019 Child Health Plus Formulary Summary

(Effective October 1, 2019)

This is a list of the preferred drugs prescribed most often to members in your plan. It is a short version of the drug list that makes up your prescription drug benefit plan. Talk to your doctor about prescribing generic drugs when it's possible. By doing this, you may save money.

NOTE: Brand-name drugs may come off this list if a generic version comes on the market during the year. Check your benefits to see which drugs we pay for and your copays. A copay is the amount you pay for health services or prescriptions. If you have questions, please call the phone number on the back of your ID card. You can find a key to this list on the last page.

Key:

Capital letters	Brand drug
Lowercase bold letters	Generic drug
(PA)	Prior Authorization – Your doctor needs to have us approve this drug before we will pay for it.
(QLL)	Quantity Level Limit – There may be a limit on how much of this drug you can get.
(ST)	Step Therapy – You will need to first try certain drugs before we will pay for other drugs. For example, if Drug A and Drug B can both be used, we may not pay for Drug B unless you try Drug A first. If Drug A does not work for you, we will then pay for Drug B.
For the member:	Generic drugs have the same active ingredients as their brand name versions. They are approved by the Food and Drug Administration. They may come in different colors or shapes.
For the doctor:	Please prescribe drugs on this list. Use generic drugs when you can.

THIS DRUG LIST IS IN EFFECT OCTOBER 1, 2019 TO DECEMBER 31, 2019, AND MAY CHANGE AT ANY TIME.

Formulary Disclaimer

Please see your plan information for more about your drug benefits. The list of drugs we pay for is based on your plan. This is also the case for your copays. We may not pay for all drugs on this list. Also, some drugs may need Prior Authorization before we will pay for them. For some drugs, we may limit the types of dosage and/or strengths. The drugs on this list may change at any time. And as new generics come on the market, the corresponding brand name drug will no longer be considered a "preferred" drug.
