Medical Guideline Disclaimer

Property of EmblemHealth. All rights reserved. No prior authorization is required for the diagnoses approved services under this policy. The clinical review criteria expressed below reflects how EmblemHealth determines whether certain services or supplies are medically necessary. EmblemHealth established the clinical review criteria based upon a review of currently available clinical information (including clinical outcome studies in the peer reviewed published medical literature, regulatory status of the technology, evidence-based guidelines of public health and health research agencies, evidence-based guidelines and positions of leading national health professional organizations, views of physicians practicing in relevant clinical areas, and other relevant factors). EmblemHealth expressly reserves the right to revise these conclusions as clinical information changes and welcomes further relevant information. Each benefit program defines which services are covered. The conclusion that a particular service or supply is medically necessary does not constitute a representation or warranty that this service or supply is covered and/or paid for by EmblemHealth, as some programs exclude coverage for services or supplies that EmblemHealth considers medically necessary. If there is a discrepancy between this guideline and a member's benefits program, the benefits program will govern. In addition, coverage may be mandated by applicable legal requirements of a state, the Federal Government or the Centers for Medicare & Medicaid Services (CMS) for Medicare and Medicaid members. All coding and web site links are accurate at time of publication. EmblemHealth Services Company LLC, ("EmblemHealth") has adopted the herein policy in providing management, administrative and other services to EmblemHealth Plan, Inc., EmblemHealth Insurance Company, EmblemHealth Services Company, LLC and Health Insurance Plan of Greater New York (HIP) related to health benefit plans offered by these entities. All of the aforementioned entities are affiliated companies under common control of EmblemHealth Inc.

Definition

Acupuncture is the practice of piercing the skin with needles at specific body sites to induce anesthesia, to relieve pain to alleviate withdrawal symptoms of substance abusers, or to treat various non-painful disorders. The placement of needles into the skin is dictated by the location of meridians. These meridians are thought to mark patterns of energy flow throughout the human body. Acupuncture has 4 components—the acupuncture needle(s), the target location defined by traditional Chinese medicine, the depth of insertion, and the stimulation of the inserted needle. Acupuncture may be performed with or without electrical stimulation
