Medical Guideline Disclaimer

Property of EmblemHealth. All rights reserved. The treating physician or primary care provider must submit to EmblemHealth the clinical evidence that the patient meets the criteria for the treatment or surgical procedure. Without this documentation and information, EmblemHealth will not be able to properly review the request for prior authorization. The clinical review criteria expressed below reflects how EmblemHealth determines whether certain services or supplies are medically necessary. EmblemHealth established the clinical review criteria based upon a review of currently available clinical information (including clinical outcome studies in the peer-reviewed published medical literature, regulatory status of the technology, evidence-based guidelines of public health and health research agencies, evidence-based guidelines and positions of leading national health professional organizations, views of physicians practicing in relevant clinical areas, and other relevant factors). EmblemHealth expressly reserves the right to revise these conclusions as clinical information changes, and welcomes further relevant information. Each benefit program defines which services are covered. The conclusion that a particular service or supply is medically necessary does not constitute a representation or warranty that this service or supply is covered and/or paid for by EmblemHealth, as some programs exclude coverage for services or supplies that EmblemHealth considers medically necessary. If there is a discrepancy between this guideline and a member's benefits program, the benefits program will govern. In addition, coverage may be mandated by applicable legal requirements of a state, the Federal Government or the Centers for Medicare & Medicaid Services (CMS) for Medicare and Medicaid members. All coding and web site links are accurate at time of publication. EmblemHealth Services Company LLC, ("EmblemHealth") has adopted the herein policy in providing management, administrative and other services to HIP Health Plan of New York, HIP Insurance Company of New York, Group Health Incorporated, GHI HMO Select, ConnectiCare, Inc., ConnectiCare Insurance Company, Inc. ConnectiCare Benefits, Inc., and ConnectiCare of Massachusetts, Inc. related to health benefit plans offered by these entities. All of the aforementioned entities are affiliated companies under common control of EmblemHealth Inc.

Definition

Aldurazyme is a recombinant form of human alpha-L-iduronidase indicated for enzyme replacement therapy in patients with Mucopolysaccharidosis I.

Length of Authorization

Coverage will be provided for 12 months and may be renewed

Dosing Limits

Max Units (per dose and over time) [Medical Benefit]:
- 667 billable units every 7 days

Guideline

I. INITIAL APPROVAL CRITERIA

Coverage is provided in the following conditions:

Mucopolysaccharidosis I (MPS I) †
- Patient has a definitive diagnosis of MPS I confirmed by one of the following:
  - Detection of pathogenic mutations in the IDUA gene by molecular genetic testing; OR
Detection of deficient activity of the lysosomal enzyme α-L-iduronidase; AND

- Diagnosis of Hurler (severe) or Hurler-Scheie (attenuated) forms of disease OR
- Diagnosis of Scheie (attenuated) form of disease with moderate to severe symptoms; AND
- Patient is 6 months of age or older; AND
- Patient has absence of severe cognitive impairment; AND
- Documented baseline value for urinary glycosaminoglycan (uGAG); AND
- Documented baseline values for one or more of the following:
  - Patients 6 years or greater: percent predicted forced vital capacity (FVC) and/or 6-minute walk test; OR
  - Patients 6 months to less than 6 years: cardiac status, upper airway obstruction during sleep, growth velocity, mental development, FVC, and/or 6-minute walk test

† FDA approved indication(s)

II. RENEWAL CRITERIA

Authorizations can be renewed based on the following criteria:

- Patient continues to meet the criteria identified above; AND
- Absence of unacceptable toxicity from the drug. Examples of unacceptable toxicity include the following: severe hypersensitivity reactions, acute respiratory complications, acute cardiorespiratory failure, severe infusion reactions, etc.; AND
- Patient does not have progressive/irreversible severe cognitive impairment; AND
- Patient has a documented reduction in uGAG levels; AND
- Patient has demonstrated a beneficial response to therapy compared to pretreatment baseline in one or more of the following:
  - Patients 6 years or greater: stability or improvement in percent predicted FVC and/or 6-minute walk test; OR
  - Patients 6 months to less than 6 years: stability or improvement in cardiac status, upper airway obstruction during sleep, growth velocity, mental development, FVC and/or 6-minute walk test
