The treating physician or primary care provider must submit to EmblemHealth the clinical evidence that the patient meets the criteria for the treatment or surgical procedure. Without this documentation and information, EmblemHealth will not be able to properly review the request for prior authorization. The clinical review criteria expressed below reflects how EmblemHealth determines whether certain services or supplies are medically necessary. EmblemHealth established the clinical review criteria based upon a review of currently available clinical information (including clinical outcome studies in the peer reviewed published medical literature, regulatory status of the technology, evidence-based guidelines of public health and health research agencies, evidence-based guidelines and positions of leading national health professional organizations, views of physicians practicing in relevant clinical areas, and other relevant factors). EmblemHealth expressly reserves the right to revise these conclusions as clinical information changes and welcomes further relevant information. Each benefit program defines which services are covered. The conclusion that a particular service or supply is medically necessary does not constitute a representation or warranty that this service or supply is covered and/or paid for by EmblemHealth, as some programs exclude coverage for services or supplies that EmblemHealth considers medically necessary. If there is a discrepancy between this guideline and a member's benefits program, the benefits program will govern. In addition, coverage may be mandated by applicable legal requirements of a state, the Federal Government or the Centers for Medicare & Medicaid Services (CMS) for Medicare and Medicaid members. Guideline

Members with the DME benefit who have diabetes are eligible for coverage of [therapeutic shoes, inserts and modifications](#) to the shoes when **both** of the following criteria are met:

1. The member has diabetes mellitus and ≥ 1 of the following conditions:
 - Previous amputation of the contralateral foot, or part of either foot
 - History of previous ulceration of either foot
 - History of pre-ulcerative calluses of either foot characterized by intralesional hemorrhaging
 - Peripheral neuropathy with evidence of callus formation of either foot
 - Foot deformity of either foot
 - Documented evidence of peripheral vascular compromise. Minimum documentation would indicate nonpalpable/absent pedal pulse(s) or noninvasive vascular studies of the lower extremities (segmental pressures) and ankle/arm index (AAI)
2. The member is being treated by the certifying physician under a comprehensive plan of diabetes care, which provides justification of medical necessity for the shoes

A **custom-molded** shoe is covered when the diabetic patient has a foot deformity that cannot be accommodated by a depth shoe. The nature and severity of the deformity must be well documented in the supplier's records and may be requested by the Plan. If there is insufficient justification for a custom-molded shoe but the general coverage criteria are met, the Plan will allow coverage based on the allowance for the least costly medically appropriate alternative.

Modifications to a diabetic's custom-molded or depth shoe are covered as a substitute for an insert. Modifications include, but are not limited to, the following:

- Flared heels
- Inserts for missing toes
- Metatarsal bars
- Offset heels
- Rigid rocker bottoms
- Roller bottoms
- Wedges

Separate inserts may be covered and dispensed independently of diabetic shoes if the supplier verifies in writing that the patient has appropriate footwear into which the insert can be placed.

Documentation

The Plan and the supplier must be in receipt of a signed certification statement from the certifying physician, specifying that criteria 1 and 2 in the Guideline section have been met.

Additional required documentation for the purchase or replacement of shoes and components is as follows:

1. An order for the shoes, inserts or modifications that has been signed and dated by the prescribing physician and kept on file by the supplier. (If the prescribing physician is the supplier, a separate order is not required; however, the item provided must be clearly noted in the patient's record. A new order is not required for the replacement of an insert or modification within one calendar year of the order on file; however, the supplier's records should reflect the reason for the replacement.)
2. A new order for any shoe replacement.
3. A new order for the replacement of an insert or modification more than one year from the most recent order on file.

Definitions

Depth shoe	Contains a full-length, heel-to-toe filler that, when removed, provides a minimum of 3/16" of additional depth used to accommodate custom-molded or customized inserts. Constructed from leather or other suitable material of equal quality. Has some form of shoe closure. Is available in full and half sizes with a minimum of 3 widths so that the sole is graded to the size and width of the upper portions of the shoe according to the American standard last sizing schedule or its equivalent. This includes a shoe with or without an internally seamless toe.
Custom-molded shoe	Constructed over a positive model of the patient's foot. Made of leather or other suitable material of equal quality. Contains removable inserts that can be altered or replaced as the patient's condition warrants. Has some form of shoe closure (this includes a shoe with or without an internally seamless toe).
Insert	A total-contact, removable inlay, potentially made of multiple-density composite material, deemed a suitable model with regard to the patient's conditions and directly molded to the patient's foot (or a positive model of the patient's foot made from custom casting). Inserts may vary in length from full foot to ¾ foot to ½ foot.
Rigid rocker bottoms	Exterior elevations with an apex positioned between 51% and 75% forward of the back end of the heel. The apex must be positioned behind the metatarsal heads and taper off sharply to the front tip of the sole. The apex height helps to eliminate pressure at the metatarsal heads. The steel in the shoe ensures rigidity. The heel of the shoe tapers off in the back in order to cause the middle of the heel to strike the ground upon footfall.
Roller bottoms (sole or bar)	Similar to rocker bottoms; however, the sole is not flat in the midfoot, but gently curves from heel to toe.
Wedges (posting)	Exterior additions designed to shift or transfer weight to the opposite side of the foot upon standing or during ambulation, providing added support, stabilization, equalized weight distribution or balance. May be positioned at the hindfoot, forefoot or both, and may be in the middle or to the side of the foot.
Metatarsal bars	Exterior bars which are placed behind the metatarsal heads in order to remove pressure from them. The bars are of various shapes, heights and constructions, depending on the exact purpose.
Offset heel	A heel flanged at its base, either in the middle, to the side or a combination of both, that is then extended upward to the shoe to stabilize extreme positions of the hindfoot.
Deluxe feature	A feature that may include, but is not limited to, style, color or type of leather.

Prescribing physician	Writes the order for the therapeutic shoe, modification or insert. The prescribing physician must be a DPM, MD or DO, and may also be the supplier.
Certifying physician	Provides the medical care for the beneficiary's condition and must be a MD or DO but not a DPM. The certifying physician may only be the supplier if the patient is residing in a defined rural area or a defined health professional shortage area.
Supplier	Actually furnishes the shoe, modification or insert to the beneficiary and bills the Plan. The supplier must be a DPM, pedorthist, orthotist, prosthetist, or other qualified individual.

Applicable Procedure Codes

A5500	For diabetics only, fitting (including follow-up), custom preparation and supply of off-the-shelf depth-inlay shoe manufactured to accommodate multi-density insert(s), per shoe
A5501	For diabetics only, fitting (including follow-up), custom preparation and supply of shoe molded from cast(s) of patient's foot (custom molded shoe), per shoe
A5503	For diabetics only, modification (including fitting) of off-the-shelf depth-inlay shoe or custom molded shoe with roller or rigid rocker bottom, per shoe
A5504	For diabetics only, modification (including fitting) of off-the-shelf depth-inlay shoe or custom molded shoe with wedge(s), per shoe
A5505	For diabetics only, modification (including fitting) of off-the-shelf depth-inlay shoe or custom molded shoe with metatarsal bar, per shoe
A5506	For diabetics only, modification (including fitting) of off-the-shelf depth-inlay shoe or custom molded shoe with off-set heel(s), per shoe
A5507	For diabetics only, not otherwise specified modification (including fitting) of off-the-shelf depth-inlay shoe or custom molded shoe, per shoe
A5508	For diabetics only, deluxe feature of off-the-shelf depth-inlay shoe or custom molded shoe, per shoe
A5510	For diabetics only, direct formed, compression molded to patient's foot without external heat source, multiple-density insert(s) prefabricated, per shoe
A5512	For diabetics only, multiple density insert, direct formed, molded to foot after external heat source of 230 degrees Fahrenheit or higher, total contact with patient's foot, including arch, base layer minimum of 1/4 inch material of shore a 35 durometer or 3/16 inch material of shore a 40 durometer (or higher), prefabricated, each
A5513	For diabetics only, multiple density insert, custom molded from model of patient's foot, total contact with patient's foot, including arch, base layer minimum of 3/16 inch material of shore a 35 durometer or higher, includes arch filler and other shaping material, custom fabricated, each
A5514	For diabetics only, multiple density insert, made by direct carving with CAM technology from a rectified CAD model created from a digitized scan of the patient, total contact with patient's foot, including arch, base layer minimum of 3/16 inch material of Shore A 35 durometer (or higher), includes arch filler and other shaping material, custom fabricated, each
