

Reimbursement Policy:

Discarded Drugs/Biologicals – Modifiers JW & JZ (Commercial)

POLICY NUMBER	EFFECTIVE DATE:	APPROVED BY
RPC20230047	1/1/2021	RPC (Reimbursement Policy Committee)

Reimbursement Guideline Disclaimer: We have policies in place that reflect billing or claims payment processes unique to our health plans. Current billing and claims payment policies apply to all our products, unless otherwise noted. We will inform you of new policies or changes in policies through postings to the Reimbursement Policies webpage on emblemhealth.com. Further, we may announce additions and changes in our provider manual and/or provider newsletters which are available online and emailed to those with a current and accurate email address on file. The information presented in this policy is accurate and current as of the date of this publication.

The information provided in our policies is intended to serve only as a general reference resource for services described and is not intended to address every aspect of a reimbursement situation. Other factors affecting reimbursement may supplement, modify or, in some cases, supersede this policy. These factors may include, but are not limited to, legislative mandates, physician or other provider contracts, the member's benefit coverage documents and/or other reimbursement, and medical or drug policies. Finally, this policy may not be implemented the same way on the different electronic claims processing systems in use due to programming or other constraints; however, we strive to minimize these variations.

We follow coding edits that are based on industry sources, including, but not limited to, CPT® guidelines from the American Medical Association, specialty organizations, and CMS including NCCI and MUE. In coding scenarios where there appears to be conflicts between sources, we will apply the edits we determine are appropriate. We use industry-standard claims editing software products when making decisions about appropriate claim editing practices. Upon request, we will provide an explanation of how we handle specific coding issues. If appropriate coding/billing guidelines or current reimbursement policies are not followed, we may deny the claim and/or recoup claim payment.

Overview:

EmblemHealth has based this reimbursement policy on the guidelines established by the Centers of Medicare and Medicaid Services (CMS) regarding reimbursement and appropriate reporting of discarded drugs and biologicals.

The intent of this policy is to serve as a general reference guide for the appropriate use of modifier JW when appended to CPT®/HCPCS codes submitted on professional and/or facility claims for discarded drugs and biologicals administered from single use vials, single use packages, and multi-use vials.

Policy Statement:

When a physician, hospital or other provider/supplier must discard the remainder of a single use/dose vial or other single use/dose package after administering a dose of the drug or biological, EmblemHealth will reimburse the amount of drug or biological discarded as well as the dose administered, up to the amount of the drug or biological as indicated on the vial or package label provided the criteria below are met.

Note: EmblemHealth does not reimburse for discarded or wasted amounts of drug from multi-dose vials/multi-use packages.

All services described in this policy may be subject to additional EmblemHealth reimbursement policies including, but not limited to, Maximum Frequency per Day.

Reimbursement Policy:

Discarded Drugs/Biologicals – Modifiers JW & JZ (Commercial)

Definitions:

Term	Definition
Discarded Drug or Biological	The amount of a single use/dose vial or other single use/dose package that remains after administering a dose/quantity of a drug or biological
Single-Dose Vial	A vial of medication intended for administration by injection or infusion that is meant for use in a single patient for a single procedure. These vials are labeled as single-dose or single-vial by the manufacturer
Multi-Dose Vial	A vial of medication intended for administration by injection or infusion that contains more than one dose of medication. These vials are labeled as multi-dose by the manufacturer and typically contain an antimicrobial preservative to help prevent the growth of bacteria.

Modifier	Definition
JW	Drug amount discarded/not administered to any patient
JZ	Zero drug amount discarded/not administered to any patient

Reimbursement Guidelines:

Modifier JZ (No Discarded Amount/Waste):

- **Effective 10/1/2024**, EmblemHealth has aligned with CMS and JZ modifier is required on all claims that bill for drugs from single-dose containers when there are no discarded amounts.
- For the administered drug amount, the claim line should include the billing and payment code (such as HCPCS code) describing the given drug, the JZ modifier (attesting that there were no discarded amounts), and the number of units administered in the units field.

Example of Appropriate Use of Modifier JZ:

Modifier JZ for reporting drugs from single-dose containers with no wastage, submit one complete claim line:

- **Claim line #1:**

HCPCS code for drug given with JZ modifier appended, the number of units given to the patient, and calculated price for the administered amount

Example: J1234 JZ

Reimbursement Policy:

Discarded Drugs/Biologicals – Modifiers JW & JZ (Commercial)

Codes That Must Be Billed with JW or JZ Modifier

To identify codes that must be billed using the JW or JZ modifier, CMS identified specific billing and payment codes to which only single-dose containers are assigned and thus may require use of the JW or JZ modifiers depending on the setting of use. *The identified codes should not be considered an all-inclusive list of codes that are subject to the JW and JZ modifier policy.*

The list is available on the [ASP Billing Resources](https://www.cms.gov/medicare/payment/part-b-drugs/asp-billing-resources) website at <https://www.cms.gov/medicare/payment/part-b-drugs/asp-billing-resources> and is updated approximately twice a year with newly identified codes.

Documentation Requirements:

The patient's medical record documentation must include the following:

- Physician's orders for the drug
- The amount of the drug administered including the discarded drug/biological
 - The total amount the vial is labeled to contain
 - The date and time the drug was discarded,
 - The amount discarded,
 - The name, licensure, and signature of the person who wasted the drug.
- The discarded drug/biological amount must be documented in the same location as the administration of the drug/biological
- A charge capture report is not considered part of the medical record and is not acceptable documentation to support drug wastage charges.

EmblemHealth may request medical records for review. These reviews can be internal or external (also known as vendor reviews). When records are received in response to the records request, the items received are considered to be the complete documentation needed to support the services billed; any items later received are deemed not to have existed at the time the claim was submitted. It is the responsibility of the billing provider to ensure that their responses to records requests are both prompt and complete.

- *Neither additional records nor amended records will be accepted once the audit review is complete*
- *If the physician's order, drug administered, and amount discarded/wasted are not clearly, completely, and properly documented in the medical records submitted for review, any excess billed amounts will be denied for insufficient documentation; and the member may not be billed.*

A provider may dispute denials of drug amounts following a claim review by submitting a written appeal. The documentation submitted for appeal reconsideration should include a written explanation of how the records submitted for the original review support the items and quantities billed. The explanation should also include how the number of billed units was calculated based on the physician's orders and medical records.

Note: Additional records that were not submitted for the original review cannot be considered in the appeal process.

Reimbursement Policy:

Discarded Drugs/Biologicals – Modifiers JW & JZ (Commercial)

Exclusions:

EmblemHealth does not reimburse the following:

- Multi-dose vial or multi-use packaged medication that is discarded or wasted or not otherwise administered to the patient.
- Discarded drugs if none of the drug was administered to the patient.
- Claims for drugs/biologicals appended with modifier JW (drug amount discarded/not administered to any patient) and another claim line does not exist for the same drug on the same date of service.
- Claims reporting identical drugs/biologicals on the same date-of-service with both JW and JZ appended.
- Claims for drugs/biologicals with no drug amount discarded/wasted that do not have a JZ modifier on same claim line for the same date-of-service.
- Drugs that are billed without using the most appropriate size vial, or combination of vials, to deliver the administered dose.
