

Zilretta™ (triamcinolone acetonide extended release injection)

Review Date: July 25th, 2018

Number: MG.MM.PH.59v2

Medical Guideline Disclaimer

Property of EmblemHealth. All rights reserved. The treating physician or primary care provider must submit to EmblemHealth the clinical evidence that the patient meets the criteria for the treatment or surgical procedure. Without this documentation and information, EmblemHealth will not be able to properly review the request for prior authorization. The clinical review criteria expressed below reflects how EmblemHealth determines whether certain services or supplies are medically necessary. EmblemHealth established the clinical review criteria based upon a review of currently available clinical information (including clinical outcome studies in the peer-reviewed published medical literature, regulatory status of the technology, evidence-based guidelines of public health and health research agencies, evidence-based guidelines and positions of leading national health professional organizations, views of physicians practicing in relevant clinical areas, and other relevant factors). EmblemHealth expressly reserves the right to revise these conclusions as clinical information changes, and welcomes further relevant information. Each benefit program defines which services are covered. The conclusion that a particular service or supply is medically necessary does not constitute a representation or warranty that this service or supply is covered and/or paid for by EmblemHealth, as some programs exclude coverage for services or supplies that EmblemHealth considers medically necessary. If there is a discrepancy between this guideline and a member's benefits program, the benefits program will govern. In addition, coverage may be mandated by applicable legal requirements of a state, the Federal Government or the Centers for Medicare & Medicaid Services (CMS) for Medicare and Medicaid members. All coding and web site links are accurate at time of publication. EmblemHealth Services Company LLC, ("EmblemHealth") has adopted the herein policy in providing management, administrative and other services to HIP Health Plan of New York, HIP Insurance Company of New York, Group Health Incorporated and GHI HMO Select, related to health benefit plans offered by these entities. All of the aforementioned entities are affiliated companies under common control of EmblemHealth Inc.

Definitions:

Zilretta (triamcinolone acetonide extended-release injection) is an extended-release synthetic corticosteroid indicated as an intraarticular injection for the management of osteoarthritis pain of the knee. It is not intended for repeat administration or for patients who are allergic to corticosteroids, triamcinolone acetonide, or any other component of the product.

Dosing:

Max Units (per dose and over time):

- 35 billable units per knee per lifetime

Guideline:

Zilretta (triamcinolone acetonide extended-release injection) is considered medically when the following criteria are met:

- Diagnosis of osteoarthritis of the knee; **AND**
- Prescribed by or in consultation with a rheumatologist or an orthopedist; **AND**
- Patient is 18 years of age or older; **AND**
- Failure of ≥ 2 week trial of one of the following (a or b), unless contraindicated or clinically significant adverse effects are experienced:
 - Oral nonsteroidal anti-inflammatory drug (NSAID) at continuous therapeutic dosing (prescription strength); **OR**
 - Topical NSAID if member is ≥ 75 years old or unable to take an oral NSAID; **AND**
- History of a positive, but inadequate, response to at least one other intraarticular glucocorticoid injection for the knee defined as:
 - inadequate pain relief; **OR**

- frequent need of rescue medications such as NSAIDs or opioids; **OR**
- need to decrease or inability to increase activity levels; **OR**
- adequate pain relief accompanied by steroid-induced hyperglycemia

Limitations/Exclusions

- Approval will be granted for a maximum of 1 dose of Zilretta (triamcinolone acetonide extended-release injection) per knee per lifetime
- Coverage cannot be renewed

Revisions

12/3/2018 – Added J3304 and removed Q9993 from Applicable Procedure Codes.

Applicable Procedure Codes

J3304	Injection, triamcinolone acetonide, preservative-free, extended-release, microsphere formulation, 1 mg
-------	--

Applicable Diagnosis Codes

M17.0	Bilateral primary osteoarthritis of knee
M17.11	Unilateral primary osteoarthritis, right knee
M17.12	Unilateral primary osteoarthritis, left knee
M17.2	Bilateral post-traumatic osteoarthritis of knee
M17.31	Unilateral post-traumatic osteoarthritis, right knee
M17.32	Unilateral post-traumatic osteoarthritis, left knee
M17.4	Other bilateral secondary osteoarthritis of knee
M17.5	Other unilateral secondary osteoarthritis of knee
