I. PURPOSE

To define and describe the accepted indications for Eculizumab products [Soliris (eculizumab) and Epysqli (eculizumab-aagh)] usage in the treatment of cancer, including FDA approved indications, and off-label indications.

Evolent is responsible for processing all medication requests from network ordering providers. Medications not authorized by Evolent may be deemed as not approvable and therefore not reimbursable.

The use of this drug must be supported by one of the following: FDA approved product labeling, CMS-approved compendia, National Comprehensive Cancer Network (NCCN), American Society of Clinical Oncology (ASCO) clinical guidelines, or peer-reviewed literature that meets the requirements of the CMS Medicare Benefit Policy Manual Chapter 15.

II. INDICATIONS FOR USE/INCLUSION CRITERIA

A. Continuation requests for a not-approvable medication shall be exempt from this Evolent policy provided:

1. The requested medication was used within the last year, **AND**
2. The member has not experienced disease progression and/or no intolerance to the requested medication, **AND**
3. Additional medication(s) are not being added to the continuation request.

B. Paroxysmal Nocturnal Hemoglobinuria (PNH)

1. The member has hemolytic paroxysmal nocturnal hemoglobinuria (PNH) and eculizumab/eculizumab biosimilar is being used to reduce hemolysis.

C. Atypical Hemolytic Uremic Syndrome (aHUS)

1. Eculizumab/eculizumab biosimilar is being used in a member with a confirmed diagnosis of aHUS, with evidence of hemolysis (LDH above normal/Haptoglobin below normal/Schistocytes on peripheral smear), and impaired renal function (serum creatinine above normal).

III. EXCLUSION CRITERIA

- A. Disease progression while on eculizumab/eculizumab biosimilar defined by a lack of response in rise of hemoglobin and continued use of blood transfusions.
- B. Eculizumab/eculizumab biosimilar is being used after disease progression with the same regimen or other anti-complement therapies, for example Ultomiris (ravulizumab).
- C. Eculizumab/eculizumab biosimilar is not indicated for the treatment of members with Shiga toxin E. coli-related hemolytic-uremic syndrome (STEC-HUS) or thrombotic thrombocytopenia purpura (TTP), defined as ADAMTS-13 activity less than 5%.
- D. Dosing exceeds single dose limit of eculizumab/eculizumab biosimilar 900 mg for PNH and 1,200 mg for aHUS.
- E. Investigational use of eculizumab/eculizumab biosimilar with an off-label indication that is not sufficient in evidence or is not generally accepted by the medical community. Sufficient evidence that is not supported by CMS recognized compendia or acceptable peer reviewed literature is defined as any of the following:
 1. Whether the clinical characteristics of the patient and the cancer are adequately represented in the published evidence.
 2. Whether the administered chemotherapy/biologic therapy/immune therapy/targeted therapy/other oncologic therapy regimen is adequately represented in the published evidence.
 3. Whether the reported study outcomes represent clinically meaningful outcomes experienced by patients. Generally, the definitions of Clinically Meaningful outcomes are those recommended by ASCO, e.g., Hazard Ratio of less than 0.80 and the recommended survival benefit for OS and PFS should be at least 3 months.
 4. Whether the experimental design, considering the drugs and conditions under investigation, is appropriate to address the investigative question. (For example, in some clinical studies, it may be unnecessary or not feasible to use randomization, double blind trials, placebos, or crossover).
 5. That non-randomized clinical trials with a significant number of subjects may be a basis for supportive clinical evidence for determining accepted uses of drugs.
 6. That case reports are generally considered uncontrolled and anecdotal information and do not provide adequate supportive clinical evidence for determining accepted uses of drugs.
 7. That abstracts (including meeting abstracts) without the full article from the approved peer-reviewed journals lack supporting clinical evidence for determining accepted uses of drugs.

IV. MEDICATION MANAGEMENT

- A. Please refer to the FDA label/package insert for details regarding these topics.

V. APPROVAL AUTHORITY

- A. Review – Utilization Management Department

- B. Final Approval – Utilization Management Committee

VI. ATTACHMENTS

- A. None
