

2016 Prior Authorization (PA) Criteria

Certain drugs require prior authorization from EmblemHealth Medicare HMO/PPO Medicare Plans. This means that your doctor must contact us to get approval before prescribing the drug to you. If your doctor does not get prior approval, the drug may not be covered.

This list also includes drugs that may be covered under Medicare Part B or Part D depending on how the drugs are used or administered. If your drug is on this list, your doctor should call us and to provide information describing the use and administration of the drug so we can advise on whether the drug will be covered.

To see if your drug is on the list, refer to the index located at the end of this document for the medication you are looking for.

EmblemHealth®

ACTHAR

Products Affected

- Acthar H.P.

PA Criteria	Criteria Details
Covered Uses	All FDA-approved indications not otherwise excluded from Part D.
Exclusion Criteria	Use in patients with multiple sclerosis (MS) as pulse therapy on a monthly basis.

- Remicade

PA Criteria	Criteria Details
Covered Uses	All FDA approved indications not otherwise excluded from Part D
Exclusion Criteria	Active infection (including TB), concurrent use with other biologics, unstable moderate to severe HF (NYHA Functional Class III/IV).
Required Medical Information	Screening for latent TB infection and assessment for Hep B risk. For positive latent TB, patient must have completed treatment or is currently receiving treatment for LTBI. HBV infection ruled out or treatment initiated for positive infection. Rheumatoid arthritis - An inadequate response or intolerance to Enbrel or Humira and one of the following: 1) inadequate response to methotrexate (MTX), 2) inadequate response to another nonbiologic DMARD (e.g., leflunomide, hydroxychloroquine, sulfasalazine) if contraindicated or intolerant to MTX, 3) intolerance or contraindication to 2 nonbiologic DMARDs. Psoriatic arthritis with predominantly peripheral symptoms - Must meet both of the following: 1) have an inadequate response or intolerance to either Enbrel or Humira, and 2) have an inadequate response to at least an 8-week maximum tolerated dose trial of at least 1 nonbiologic DMARD unless contraindicated or intolerant to such therapy. For plaque psoriasis - More than 10% BSA affected or has crucial body areas (e.g., feet, hands, face) affected. An inadequate response to at least a 60-day trial of 2 conventional therapies (e.g., phototherapy, calcipotriene, MTX, acitretin) unless contraindicated or intolerant to such therapies. Crohn's disease - Must meet both of the following: 1) have an inadequate response to at least a 60-day trial of 1 conventional therapy (e.g., corticosteroids, sulfasalazine, azathioprine, mesalamine) unless contraindicated or intolerant to such therapy, and 2) have an inadequate response or intolerance to either Humira or Cimzia. Ulcerative colitis - An inadequate response to at least a 60-day trial of 2 conventional therapies (e.g., corticosteroids, mesalamine) unless contraindicated or intolerant to such therapies.
Age Restrictions	For plaque psoriasis, patient must be 18 years of age and older.

REVLIMID

Products Affected

- Revlimid

PA Criteria	Criteria Details
Covered Uses	All FDA approved indications not otherwise excluded from Part D
Exclusion Criteria	Pregnancy
Required Medical Information	For active myeloma patient meets one of the following: 1) Revlimid is used in combination with dexamethasone. 2) Revlimid is used as maintenance monotherapy following response to either stem cell transplant or primary induction therapy. For mantle cell lymphoma (MCL): Revlimid is used after 2 prior therapies, 1 of which is bortezomib. For Low or Intermediate-1 Risk myelodysplastic syndrome (MDS): for those with 5q deletion, patients should have transfusion-dependent anemia or symptomatic anemia with clinically significant cytopenias. For those with non-5q deletion MDS and symptomatic anemia, patients should have failed to respond to epoetin alfa or darbepoetin or have a pretreatment serum erythropoietin levels greater than 500 mU/mL and a low probability of response to immunosuppressive therapy. For female patients of childbearing potential, pregnancy is excluded by 2 negative serum or urine pregnancy tests. For all patients, complete blood counts are monitored for hematologic toxicity while receiving Revlimid.
Age Restrictions	N/A
Prescriber Restrictions	N/A
Coverage Duration	Plan Year
Other Criteria	Male and female patients of child-bearing potential should be instructed on the importance of proper utilization of appropriate contraceptive methods for Revlimid use. Patients should be monitored for signs and symptoms of thromboembolism.
