Medical Guideline Disclaimer

Property of EmblemHealth. All rights reserved. The treating physician or primary care provider must submit to EmblemHealth the clinical evidence that the patient meets the criteria for the treatment or surgical procedure. Without this documentation and information, EmblemHealth will not be able to properly review the request for prior authorization. The clinical review criteria expressed below reflects how EmblemHealth determines whether certain services or supplies are medically necessary. EmblemHealth established the clinical review criteria based upon a review of currently available clinical information (including clinical outcome studies in the peer-reviewed published medical literature, regulatory status of the technology, evidence-based guidelines of public health and health research agencies, evidence-based guidelines and positions of leading national health professional organizations, views of physicians practicing in relevant clinical areas, and other relevant factors). EmblemHealth expressly reserves the right to revise these conclusions as clinical information changes, and welcomes further relevant information. Each benefit program defines which services are covered. The conclusion that a particular service or supply is medically necessary does not constitute a representation or warranty that this service or supply is covered and/or paid for by EmblemHealth, as some programs exclude coverage for services or supplies that EmblemHealth considers medically necessary. If there is a discrepancy between this guideline and a member's benefits program, the benefits program will govern. In addition, coverage may be mandated by applicable legal requirements of a state, the Federal Government or the Centers for Medicare & Medicaid Services (CMS) for Medicare and Medicaid members. All coding and web site links are accurate at time of publication. EmblemHealth Services Company LLC, ("EmblemHealth") has adopted the herein policy in providing management, administrative and other services to HIP Health Plan of New York, HIP Insurance Company of New York, Group Health Incorporated and GHI HMO Select, related to health benefit plans offered by these entities. All of the aforementioned entities are affiliated companies under common control of EmblemHealth Inc.

Guideline

Alpha-1-Proteinase Inhibitors are considered medically necessary for emphysema secondary to alpha-1-antitrypsin (ATT) deficiency when the following criteria are met; all:

1. Presence AAT deficiency with PiZZ, PiZ (null) or Pi (null,null) phenotypes
2. Presence of AAT deficiency and clinical evidence of panacinar emphysema
3. Low serum AAT concentration (≤ 11 uM/L [35% of normal] or ≤ 80 mg/dL [measured by radial immunodiffusion] or ≤ 0.8 g/L [measured by nephelometry]
4. Member is a non-smoker
Renewal Criteria

Coverage will be given for six months and is eligible for renewal when both of the following criteria are met:

1. Positive response to treatment (defined by elevation of AAT levels above baseline and/or substantial reduction in deterioration-rate of lung function, as measured by percent-predicted FEV1)

2. Absence of unacceptable drug-toxicity (i.e., hypersensitivity reactions)

Limitations/Exclusions

Alpha-1-Proteinase Inhibitors are considered investigational and not medically necessary for any indications other than those listed above due to insufficient evidence of therapeutic value.

Revision History

1/12/18 — added prerequisite that member must be a non-smoker
