Biomagnetic Therapy

Definitions

Biomagnetic therapy (aka magnetic therapy, magnetherapy, magnotherapy, static magnetic field therapy or therapeutic magnets) consists of placing a magnet on or near the skin using a variety of devices (e.g., bracelets, necklaces, insoles, sleeves, head bands, mattress pads, etc.) to create an electromagnetic field to areas of musculoskeletal damage or perceived discomfort. Proposed uses include degenerative joint conditions such as osteoarthritis, joint and tendon injury.

- Radiofrequency Ablation for Spinal Pain

Guideline

Biomagnetic therapy is considered investigational and not medically necessary.

Limitations/Exclusions

Biomagnetic therapy, in any capacity, is not considered medically necessary for pain management (or any disease/condition) due to insufficient evidence of therapeutic value.
Applicable Procedure Code

97799 — Unlisted physical medicine/rehabilitation service or procedure
